EXPERIENCE

Business Analyst Executive

Mar 2026- Current position

Flattrade broking private limited | Chennai,India

- Coordinating the end-to-end implementation of a **CTCL platform migration project**, facilitating the replacement of the existing trading infrastructure with a new third-party CTCL solution.
- **Gather and consolidate functional and technical requirements** from business and engineering teams, ensuring accurate communication and successful execution of project objectives.
- Lead daily project coordination alongside senior management, working with **15-20 cross-functional stakeholders** across business, development, vendor, operations teams to ensure timely project execution.
- Manage project timelines, deliverables, meeting minutes (MoMs), and status reporting to maintain alignment across all stakeholders.
- Coordinate the migration and integration approvals across **NSE, BSE, and MCX**, supporting seamless implementation and exchange readiness ensuring compliance regulations are followed
- Manage client onboarding for **API and algorithmic trading**, guiding clients through UAT testing and product documentation, exchange approval processes, compliance requirements, and implementation readiness.
- Oversee **post-trade operational activities** by monitoring contract note delivery
- Analyze exchange compliance alerts pertaining to **sub-10 Orders Per Second (OPS)** regulations for algorithmic trading clients by reviewing order lifecycle data, investigating potential breaches, and submitting comprehensive compliance reports and clarifications to exchanges for regulatory closure.
